Whirlpool cabrio top loading washer error codes

Master Tech | April 8, 2017 | Error Codes | The Whirlpool Cabrio error codes are listed below with a brief explanation of the code and linked to the repair help page for the specific code. Click on the error code for more information and troubleshooting details. Older Model Whirlpool Cabrio Error Codes For Washers (2013 Models and Earlier) Older Whirlpool Cabrio Error Codes List of Alphabetic Codes DL - Door Lock issue, the control detects the door is not locking. DU - Door unlock issue, the control detects the door is not unlocking. HC - Hot and cold supply lines reversed. LD - Whirlpool cabrio washer code lf: Long Drain, meaning its taking too long for the washer to drain. LF - Long Fill, meaning its taking too long for the tub to fill up with water. LID - Usually occurs when you try to start a cycle with the lid raised. OL - Overload issue, the control has detected the load to be too large for the tub capacity. PO - Pump Out. Happens when the lid has been open for more than ten minutes with water in the tub. SD - Control detects too much drag on the basket. UL - Unbalanced load, the load in the basket is out of balance. Older Whirlpool Cabrio Error Codes List of F Codes F1 - Bad signal received from water level pressure switch circuit. F2 - Stuck key detected on the user interface. F30 - Same as LF Code. F32 - Same as LD Code. F36 - Communication error between the central control unit (CCU) and the user interface (UI). F40 - Control detects the automatic temperature control is open or shorted. F41 - Control detects that the motor rotor position sensor (RPS) has a shorted or open thermistor. F42 - Main control can't detect if the heater is on or off. F43 - Main control detects the heater is staying on continuously. F50 - Motor rotor position sensor (RPS) senses no rotation from the motor. F51 - Whirlpool cabrio washer error code f51: Control board detects a bad RPS (Motor Rotor Position Sensor). F52 - Main control board detects a motor stop failure. F54 - main control board detects high current from the motor module F53 - Motor module temp too high. F68 - Same as F1 Code. F70 - Same as OL Code. F71 - Same as SD Code. F72 - Main control does not know if basket engaged or not. F80 - Same as DL Code. F81 - Same as LID Code. F82 - Same as DL Code. F83 - Same as DU Code. F84 - Same as DL Code. F85 - Same as DL Code. Newer Model Whirlpool Cabrio Error Codes For Washers (2014 Models and Later) Newer Alphabetic Codes LF - Long Fill, Taking too long for the washer to fill with water. DRN - Long Drain, Taking too long for the washer to drain. F0E2 - Excessive suds causing friction on the drive system or mechanical friction issue. F0E3 - Load in basket exceeds capacity of washer. F0E4 - Water temperature too hot. F0E5 - Off balance load. F1E1 - Main control failure. F1E2 - Motor control circuit failure in main control. F2E1 - Stuck key on user interface board. F2E3 - UI Mismatch: Failed UI Board or Wrong Replacement Board Installed. F2E4 - Indicates that a parameter file in the UI is not correct. Replace The UI Board. F2E5 - Indicates that a parameter file in the UI is not correct. Replace The UI Board. F3E1 - Out of range pressure signal. F3E2 - Inlet water temperature fault. F4E1 - Heater stuck on. F4E2 - Heater not coming on. F5E1 - Lid Switch Fault. Usually means Lid Lock is in a locked state but lid is open on washer. F5E2 - Lid Lock Switch Failure, lid not locking. F5E3 - Lid Lock Failure, lid will not unlock. F5E4 - Lid was not raised between cycles. F6E2 - Communication error User Interface Board can't communicate with Main Board. F6E3 - Communication error. Main Board can't communicate with User Interface Board. F7E0 - No or low voltage to main board. F7E1 - Main Control Board lost power during spin cycle. F7E2 - Drive motor or Motor circuit fault #1. F7E3 - Drive motor or Motor circuit fault #2. F7E4 - Drive motor or Motor circuit fault #3. F7E5 - Main Board has detected a shifter failure. F7E6 - Main Board detected one or more motor lines open. F7E7 - Main Board detected motor not getting up to full speed. F7E8 - Main Board detected motor temperature getting too high. F7E9 - Main Board detected motor is not moving. F8E1 - Long Fill, Taking too long for the washer to fill. F8E3 - Over flow condition , too much water in tub. F8E6 - Main Board detects water in tub while lid is open. F9E1 - Long Drain, Taking too long for the washer to drain. F9E2 - Main Board detects water in tub is not draining. If you need help with any of the error codes listed above or need a whirlpool cabrio tech sheet you can get help from one our factory trained whirlpool technicians using our live tech help, just click on the live tech button at the bottom right of your screen. Factory Trained Appliance Technician With 20 years of In-Home Appliance Repair Experience. Washers, Dryers, Refrigerators, Freezers, Dishwashers, etc; Here is information that will assist you in identifying what may be making your Whirlpool Cabrio washer display an error code. Identifying what the error or fault code is will help you to repair your washer. The Whirlpool Cabrio specific error fault codes below are to give you an idea as to what part is at fault. You may have to do further troubleshooting to find what may be causing the fault for that specific part.Whirlpool Cabrio Washing Machine Error/Fault Codes - Probable Fault IdentifierWhirlpool Cabrio Washing Machine Letter codes and Number codesWhirlpool Cabrio Error Fault Code = dl (F80, 82, 84, 85)Error Condition = Door Lock FailRepair or Check Components = Door lid is not closed completely.Whirlpool Cabrio Error Fault Code = DU (F83)Error Condition = Door Unlock FailRepair or Check Components = Heavy force on lid is preventing lock bolt from retracting.Whirlpool Cabrio Error Fault Code = F1 (F60-68)Error Condition = Primary Control FailRepair or Check Components = Primary control failure.Whirlpool Cabrio Error Fault Code = F2Error Condition = Keypad User Interface FailRepair or Check Components = Stuck key is detected.Whirlpool Cabrio Error Fault Code = F40Error Condition = ATC Thermistor Open ShortRepair or Check Components = ATC Thermistor is detected to be open.Whirlpool Cabrio Error Fault Code = F41Error Condition = Motor RPS Thermistor Open ShortRepair or Check Components = Motor rotor position sensor (RPS) thermistor is detected to be shorted.Whirlpool Cabrio Error Fault Code = F42Error Condition = Heater Thermistor Open ShortRepair or Check Components = Heater thermistor is open or shorted.Whirlpool Cabrio Error Fault Code = F50Error Condition = Motor StalledRepair or Check Components = Motor rotor position sensor (RPS) senses no rotation spin.Whirlpool Cabrio Error Fault Code = F51Error Condition = Motor RPS FailRepair or Check Components = Motor rotor position sensor (RPS) failure.Whirlpool Cabrio Error Fault Code = F52Error Condition = Motor Stop FailRepair or Check Components = Motor rotor position sensor (RPS) senses rotation after stop commands.Whirlpool Cabrio Error Fault Code = F53Error Condition = Motor Control Over TemperatureRepair or Check Components = Machine/motor control detects high temperature for the motor module assembly.Whirlpool Cabrio Error Fault Code = F54Error Condition = Motor Control Over CurrentRepair or Check Components = Machine/motor control detects high current for the motor module assembly.Whirlpool Cabrio Error Fault Code = F72Error Condition = Basket Re-engage FailRepair or Check Components = Basket check routine fails to determine if the basket is re-engaged after being disengaged.Whirlpool Cabrio Error Fault Code = HCErrror Condition = Hot and Cold ReversedRepair or Check Components = Hot and cold inlet hoses are reversed.Whirlpool Cabrio Error Fault Code = Ld (F32)Error Condition = Long Drain TimeRepair or Check Components = Water level does not change after the drain pump is on.Whirlpool Cabrio Error Fault Code = LF (F30)Error Condition = Long Fill TimeRepair or Check Components = Water level does not change for a period of time after the valves are turned on. Water has disengaged the basket but control does not detect a water level change.Whirlpool Cabrio Error Fault Code = Lid (F81)Error Condition = Open or Close Door LidRepair or Check Components = User presses START with lid open. User presses START after 2 machine cycles without opening lid. The machine/motor control cannot detect the lid switch opening and closing properly.Whirlpool Cabrio Error Fault Code = ol (F70)Error Condition = Overloaded TubRepair or Check Components = Machine/motor control detects a load size that exceeds the tub capacity.Whirlpool Cabrio Error Fault Code = PoError Condition = Pump Out Lid OpenRepair or Check Components = Drain pump begins pumping out water from tub upon activation by the door lid having been left open for 10 minutes or more.Whirlpool Cabrio Error Fault Code = Sd (F71)Error Condition = Excessive Suds DetectRepair or Check Components = Machine motor control detects a suds lock condition and is steady on while the control then runs a small clean out cycle.Whirlpool Cabrio Error Fault Code = uLError Condition = Unbalanced Wash LoadRepair or Check Components = Motor control detects off balance load and is steady on while the washer runs a small cycle to re-balance load.Whirlpool Cabrio Washer Error Codes ChartNeed assistance with finding an error code for your washer? Ask your question below and we will be happy to assist.
